Crowd Software Consulting LLC understands the life cycle of software that begins with the initial coding then move to alpha and beta testing and finally cycle into a full production model with replication capabilities for disaster recovery. The Software development process begins with generation of an RFQ to understand your requirements followed by an extensive research and development to make a Proposal. At Crowd Software Consulting LLC, we offer both Cloud and Dedicated Hosting solutions with flexible service and term options. The same infrastructure is used for development testing, production operation, or in combination with our Hybrid Hosting options to maintain separation between your testing and production environments as one architecture Our business-oriented approach separates us from the other Software Development Companies. At Crowd Software Consulting LLC we try to understand your brand and use creative insights to push your business and our technical team ensures a seamless delivery of your product without any glitches.

### **The Software Development Discovery Phase:**

- Defining the project structure: Identification of an administrative structure and the standards for managing the project
- Defining your business goals: Analysis of your business objectives and potential opportunities.
- Assessing the current situation: Evaluation of the current situation and analysis to create the problem statement and identify the direction of the project.
- Creating a vision statement and project scope: Vision statement and scope of the project is created for guiding the team toward its business goals.
- Defining requirements and user profiles: Identify the requirements for the solution of the stakeholders, end users, and sponsors for the project.
- Developing a solution concept: Creation of a baseline – outlining of the approach that the team will take to create the solution
- Assessing risk: Identification and assessment of the risks to the project, and creation of a risk mitigation plan.
- Closing the Discovery Phase: Accomplished when the vision/scope document is formally approved by all stakeholders and the project team.
- Technology solutions: HTML for static sites, Database, asp for e-commerce or large sites, Flash animations for any site.

# Web Application Development

## Website Development Services

Websites Designed to give you the edge over competition

At Crowd Software Consulting LLC, design is not just a visual representation. We pride ourselves on connecting you to your clients in a way where there is usability, accessibility and brand recognition.

Our designers are masters of their craft. Besides the artistic ability of our designers, we are aware of the many components required for a successful and powerful website. Elements such as understanding usability, search engine principals, design principals, conversion techniques, optimization methods, understanding how a content management system works are all taken into consideration in the design and developmental process.

Crowd Software Consulting LLC – A Global Web Development Company

1

We understand keeping your brand image is important  
Our designs are unique and created specifically for your business. We make sure your brand image stays consistent in both online and offline channels.

2

We make it user friendly and easy to use  
We never forget that no matter how fancy the websites can go simplicity should not be faded away. The navigation and sales funnel needs to be SIMPLE.

3

Our ecommerce websites stand out of the competition  
Ecommerce websites work differently than business websites. We build ecommerce sites using Magento as well as our .NET based Sugarcube CMS.

4

Our skilled developers use cutting edge technology  
Our years of experience in various technologies kept us ahead of other web companies. Right use of suitable technologies ensures that expansion and scalability is as easy as it can get for our clients.

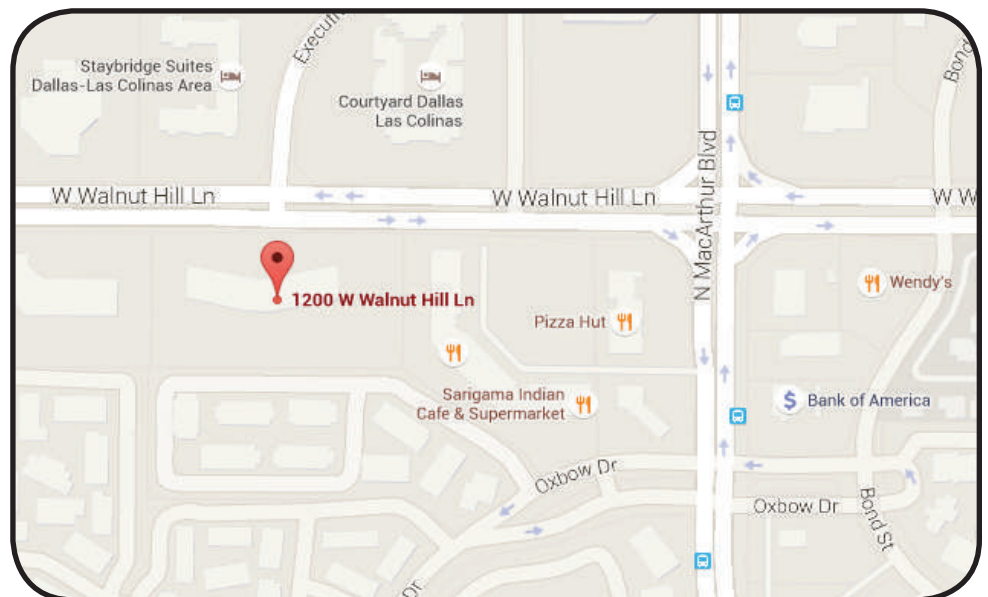

5

We build Sales driven websites  
No matter how pretty your website is, if the conversion techniques are not implemented correctly the website will not generate sales for you. At Crowd Software Consulting LLC, implementation of conversion techniques is being followed from start to finish of every project.

6

We know how websites work with Mobile Technologies, Social Media and Search Engines  
Being cool and up to date with the technologies certainly help with retaining your clients. We make sure all your channels are connected in some way to your website so you keep all your assets bonded together.
